

## Roomside Series

## Decorative LED Ventilation Fan/Lights. Style that fits you.

Upgrade the style of your bathroom or powder room with an elegant and modern decorative ventilation fan/light. Low-profile LED panels are not only bright but also long-lasting for illumination where and when you need it. Designed to completely conceal drywall cuts, the fan stays hidden behind the included adapter which blends in seamlessly with popular ceiling paint colors. Powerful, efficient ventilation works quietly to keep your space free from odors and humidity.

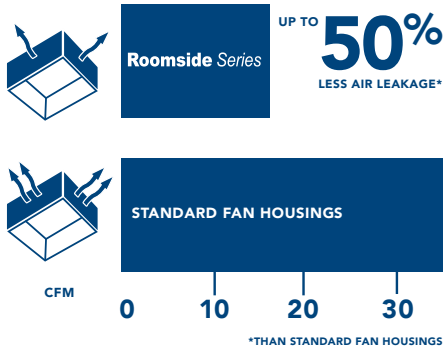

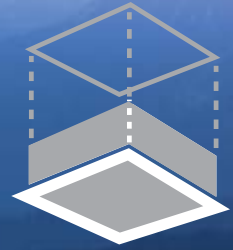

# Roomside Series for easy installation\*

Retrofit installations can be done entirely from the room side—no attic access required. This means faster, easier installation even for the most novice do-it-yourselfer.

\*All models are Roomside installable except the 770RLTK.

**NO ATTIC ACCESS NEEDED**

- Beautifully styled low-profile luminaries fit all types of decor
- Included adapter completely covers drywall cuts for hidden ventilation
- Simple installation with a plug-in light feature
- Long-lasting dimmable LED lights rated for 15,000 hours of life
